# labom

## Gas expansion thermometer

### with inline detecting element

Type series FS....

#### Application area

- Pharmaceutical industry
- General process technology
- Food industry
- Biotechnology

### Features

- Gas expansion thermometer for dead-zone free measurement in pipes
- The whole inner surface of the pipe wall works as temperature transducer
- Piggable and suitable for CIP-cleaning
- High quality case with bajonet ring NS 100/160, degree of protection IP 66
- Nominal ranges -40 °C...200 °C
- Case, measuring system and temperature transducer of stainless steel
- Accuracy class 1 per EN 13190 when insulated in the plant
- Micro adjusting pointer for indication correction
- Immersion lengths are the same as at LABOM diaphragm seals, see product group D5
- EAC declaration (upon request)

#### Options

- Approvals/Certificates
  - Explosion protection (ATEX/UKEX) for mechanical devices
  - Material certificate per EN 10204-3.1
  - Calibration certificate per EN 10204-3.1
- As per UKCA regulations
- Case with liquid filling
- Electronical angle-of-rotation sensor, Type series PL1100, see data sheet D6-020
- Wetted parts electropolished

#### Application

Mechanical inline thermometers allow dead-zone free measuring of the pipe wall temperature. Measuring is performed without cross-sectional alterations. The lower the medium viscosity, the higher the measurement accuracy, The whole inner surface of the pipe wall works as temperature detecting element. The instrument becomes an integrated part of the pipeline. Various pipe connection elements are available. During CIP procedures the nominal range should not be exceeded.

## **Technical data**

#### Constructional design / case

Constructional	design / case		
Design:	High quality case with bajonet ring, material: stainless steel matno. 1.4301 (304)		
Nominal size:	NS 100 or NS 160		
Degree of pro- tection per EN 60529:	IP 66		
Case filling:	Labofin		
	Further filling liquids upon request.		
Case seal:	Material gasket: NBR		
Window:	Non-splintering laminated glass. Option: Non-splintering plastic (Macro- lon)		
Movement:	Stainless steel with compensation		
Scale:	Pure aluminium, white with black in- scription. Alternatively with marking or fixed reference pointer.		
Pointer:	Pure aluminium, black with micro adjustment for zero point cor- rection		
Process connec	tion		
Design:	Threated or clamp as part of piping, Connections and nominal widths see or- der details. Material: stainless steel matno. 1.4404 (316L)		

Further process connections upon request. An insulation in plant of the measuring point is recommended.

Pressure See tables below dimensions. stage:

#### **Measuring element**

Measuring element: Bourdon tube, dead zone free with noble gas filling.

Nominal	range

	Nominal ange (EN 3190):	-40200 °C. Measuring span ≥ 60 °C. Alternatively extension of measuring range to the complete nominal range. (Please not CIP cleaning temperature)
(Please not CIP cleaning temperatur		(Please not CIP cleaning temperature)

See order details, further upon request.

#### Accuracy

Accuracy 1.0 per EN 13190 class:

#### **Temperature ranges**

Ambient:	Per EN 13190. Ambient temperatures that deviate fro EN are to be specified.				
Storage and transport:	-20…60 °C Further temperature ranges upon re- quest.				

#### **Tests and certificates**

Explosion pro- tection:	Ex-protection (ATEX/UKEX) for me- chanical devices
	🐵 ll 2G Ex h llC T1T6 Gb X
	🐵 II 2D Ex h IIIC Txx°C Db X

Further details and temperature limits see Ex Instruction XA\_005.

#### Instructions for use

The loading capacity of the temperature detecting element depends on the following parameters:

- Media
- Media pressure
- Media temperature
- Flow velocity
- Insertion length
- Material

A technical examination might be necessary.

## Information on other models see order details or upon request.

Further information to mounting and operation see Operating Instruction BA\_017.

Threaded pipe connection per DIN 11851 or DIN 11864-1

Clamp connection per ISO 2852, DIN 32676 or DIN 11864-3
